Physical Layout Usage Instructions:

If there are no PV modules, there is no need to perform operations on the corresponding square cells.

If only PV modules are installed and optimizers are not installed, darken the dotted boxes in the corresponding square cells of the PV modules.

If PV modules are installed and optimizers are configured, remove labels from the optimizers and attach them to the corresponding square cells, then write an alias (you are advised to use the string number and offset as the alias). Ensure that each QR code label is attached within the square cell.

String number — X-X — Offset

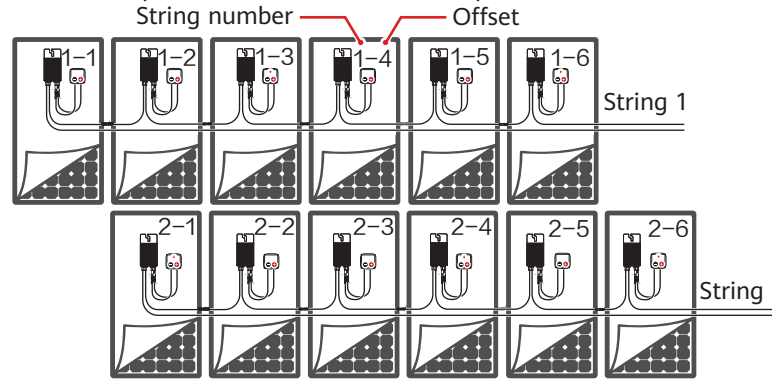

The right-side label on the front of the optimizer is to be removed and attached to the physical layout template.

Physical Layout Usage Examples:

Example 1 (single drawing):

Installation positions of PV modules and optimizers

Example 2 (multiple drawings):

Installation positions of PV modules and optimizers.

The following shows the marks on the physical layout drawing.

Sheet 1 of 2		To sheet		Physical Layout Template
